GeoVISION™ Fixed Mirror

Mirror
GS-0021

The Fixed Mirror mounts on the front of both the Standard Stainless Steel and the Standard Plastic cameras. It is used to provide a 90° view of the bore wall.

The fixed mirror does not cover the entire field of view. This allows for a limited view down the bore as well as a view of the bore wall.

Specifications:

Length	4 inches (10.2 cm)
Width	1 inch (2.54 cm)
Height	0.75 inches (2 cm)
Mirror Width	1 inch
Mirror Height	0.625 inches
Weight	0.3 oz (8.5 g)
Mirror Angle	45 °

Compatibility

Standard Stainless Steel Cameras	Yes
Standard Plastic Cameras	Yes
Nano Camera	No*
Dual-Scan Micro	No

*Because the width of the mirror is larger than the diameter of the Nano camera, it was not designed to be used with the Nano. However, if used in bores of at least 1.5 inches (3.8 cm) in diameter, the fixed Mirror can be jury rigged to work with the Nano camera using tape.
